

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

1. **(Currently Amended)** An interactive life time journal system, comprising:
an information database store for keeping user journal data; and
an interface for prompting the user for collecting the user's life history, ideas, and stories according to a selected list of questions, ~~querying and receiving/supplying information from the user to store in the database and to the user.~~

wherein the answers to the selected list of questions generate content for storage according to a selected template to generate associated memory content.

2. **(Original)** An interactive life time journal system according to claim 1, further comprising a product/service vendor tie-in system for connecting a user with a particular vendor related to a topic of interest or use to the user.

3. **(Original)** An interactive life time journal system according to claim 1, wherein said system is adapted to record an entire lifetime of information and data, from conception to the grave.

4. **(Currently Amended)** An interactive life time journal system according to claim 1, further comprising at least one link to at least one service provider, ~~wherein the system comprises a coaching, advice and instruction system.~~

5. **(Currently Amended)** An interactive life time journal ~~coaching, advice and instruction~~ system according to claim 4, further comprising at least one link to at least one vendor, ~~a product/service vendor tie in system for connecting a user with a particular vendor.~~

6. **(Currently Amended)** An interactive life time journal ~~coaching, advice and instruction~~ system according to claim 5, wherein said system ~~is a journal system and~~ is adapted to record an entire life, from conception to the grave.

7. **(Original)** The system according to claim 1, wherein said system enables users to access myriad pertinent vendors, products and services, appropriate to various life stages and at the precise time they are needed.

8. **(Currently Amended)** The system according to claim 1, further comprising at least one link to at least one other user, ~~wherein said system enables users to maintain relationships and connections throughout their life.~~

9. **(Currently Amended)** A digital archiving system comprising an interface for prompting a user for collecting the user's life history, ideas, and stories according to a selected list of questions, adapted to archive for all of ~~one's~~ the user's important documents and life

artifacts beyond the reach of a single lifetime, ~~thereby connecting generations in ways previously~~
~~inconceivable~~.

10. **(Original)** The system according to claim 9, wherein said system is divided into specific "Life Stage Concepts" to enable a journaling process to be broken up into discrete segments.

11. **(Original)** The system according to claim 10, wherein said "Life Stage Concepts" are selected from the group consisting of birth related, school age related, post school related, family related, relationship related, post family life related and preparing for death related.

12. **(Original)** The system according to claim 1, wherein said system is divided into specific "Life Stage Concepts" to enable a journaling process to be broken up into discrete segments.

13. **(Original)** The system according to claim 12, wherein said "Life Stage Concepts" are selected from the group consisting of birth related, school age related, post school related, family related, relationship related, post family life related and preparing for death related.

14. **(New)** The interactive life time journal system according to claim 4, wherein the service provider provides at least one of coaching, advice, and instruction services.

15. **(New)** The system according to claim 8, further comprising a central database for storing contact information of the user and the other user, adapted so that each of the user and the other user can update their own contact information and access the other's contact information.
